

THE RESEARCH REPORT 2013

Introduction

Scientific research is in the DNA of HEC Management School of the University of Liège. Our institution has for missions the production of scientific knowledge and the diffusion of this knowledge. Teaching and research are thus intrinsically linked. Our objective in research is to be excellent. We conceive excellence as the ability to be influential and we are in search for influence both at the international level in the scientific community and at the regional level in our socio-economic environment.

Reaching excellence in research is challenging. The school has developed a series of tools to increase and monitor our research performances that are presented in the research report. It presents the scientific accomplishment of our school during the year 2013. The school has a permanent research committee PRISME, headed by the research director. This committee designs the research strategy and manage our research budget. The School has an international scientific committee (CoSci), composed of 12 internationally renowned experts. The CoSci meets every two years to evaluate our progress and help us to design our research strategy.

HEC has identified six fields of research concentrating an intense research activity, the peaks of excellence: Asset and risk management, Economic analysis and public governance, Human resource management and organizational change, Social economy and the social enterprise, Supply chain management and the Tax institute. These peaks of excellence are our flagships that we want to further promote. In addition to these peaks of excellence, we have two transversal platforms: Sustainable strategy and strategic intelligence. The peak of excellence strategy has proved to be useful for attracting research funding. HEC hosts 12 sponsored chairs and participate in large-scale research programs financed by the University and the Wallonia-Brussels Federation (3 ARC projects), the Federal Government (3 IAP Programs) and the European Union (1 European infrastructure program).

We are proud of our PhD program in Management and Economics that received the EPAS accreditation. This program contributes to the internationalization of the School. Currently, we are hosting more than 60 doctoral candidates and 5 post-doctoral researchers from Belgium, Europe, Asia, Africa and North America. These young researchers coming from all around the world brings new ideas to HEC and they participate actively to the development of research in our School.
